

Blue Ridge Cascade update on withdrawn support petition

Date August 10-11, 2026
From Logan Hampton, Senior Director of Development, Blue Ridge Cascade
To Erika Graham, Woodhaven Unites
Subject Woodhaven Unites Community Meeting September 1, 2026 - follow-up

August 10, 2026 - Logan Hampton: Thank you for the invitation and continued engagement on Woodhaven. I appreciated our conversation last month and the perspective you shared - I've kept your concerns in mind since.

First, on the support petition: we took the petition down shortly after it went out and it has remained down since. Our intention is to start fresh with a new petition only after we have shared a proposal the community has had a real opportunity to see and respond to.

Second, we have launched a project website at WoodhavenTogether.com as a central place for residents to continue submitting feedback and to find information as the proposal develops. We are also planning a community event in September but are still working on some of the details.

August 11, 2026 - Logan Hampton: Thank you for flagging this. I looked into it as soon as I saw your note. The petition form was taken down from our site in July, but the short link remained reachable. That was an oversight and it has now been fully disabled and confirmed closed.

No responses were received after we withdrew the petition, and none of the original submissions will be used to represent community support to the City, TIF 13, or in any other setting. We're setting that petition aside completely and will start fresh after residents have had an opportunity to review the proposal, as I described.
